

# Rendering in Revit Architecture

Duration | 2 Days

## Description:

Generating holistic representations of your building project for marketing, in-house studies and presentations is an invaluable feature of Revit Architecture. Unfortunately it is too often under utilized. Don't let these powerful tools go unused in your projects! This class will teach you everything you need to know about creating perspective and photo-realistic images, animated sun studies and video walk-thrus.

## Prerequisites:

Participants must have a strong understanding of the fundamentals of Revit Architecture.

## Objectives:

The primary objective of this course is to master Revit Architecture's powerful presentation capabilities. Class participants will learn how to create clear and effective perspective and photo-realistic images along with animated sun studies and video walk-thrus of their Revit Architecture model.
